Today’s construction industry encompasses a wide spectrum of careers, from operating heavy equipment to drawing plans as an architect to designing bridges as an engineer.

Mahalo to the many partners who have assisted us over the years, including:

University of Hawai‘i, College of Engineering
Honolulu Community College
Hawai‘i Department of Transportation
Hawai‘i State Department of Education
National Association of Women in Construction
General Contractors Association of Hawaii
Trade Organizations
Labor Unions
Private Sector Contractors

INSPIRING HAWAI‘I’S YOUTH TO PURSUE CAREERS IN THE FIELDS OF CONSTRUCTION, ENGINEERING AND ARCHITECTURE.
Hawai‘i Construction Career Days is an annual event where high school and college students have the opportunity to learn about careers in construction, engineering, and architecture. Since its start in 2007, over 10,000 Hawai‘i students statewide have participated in this event.

Participants experience first-hand what it’s like to work on a construction site. They operate heavy equipment and machinery, take a ride in a boom lift, test their skills on a crane simulator, and engage in all kinds of interactive activities and skill-building competitions. Besides the hands-on experience, participants are also provided with useful information regarding college classes related to the construction industry and learn about post-secondary educational opportunities in the fields of architecture and engineering.

Hawai‘i Construction Career Days is sponsored, in part, by the Hawai‘i Department of Transportation, trade and labor organizations, private construction companies, corporate sponsors, and many more.
