Did you know...

There are as many as 2 billion t-shirts sold worldwide every year.

T-shirt recycling keeps nearly 5 billion ton of textile waste out of landfills annually!

Nearly 60% of Americans have more than ten t-shirts, which is enough to circle the earth 34 times. It take 56 million t-shirts to make a full circle around the world!
Other ways to up-cycle a t-shirt:

- Make a rug!
- Create a one of kind quilt for someone special!
- Use the sleeves of the t-shirt as a headband or sweat-band.
- Use the sleeves of the t-shirt to wash your car.
